WORK EXPERIENCE

Capgemini

Senior Consultant – UI / Angular Developer

11/2024

- Led a 6-member team to deliver 3+ high-priority BFSI applications, **reducing initial page load time by 30%** through lazy loading and AOT compilation."
- Optimized **Agile delivery workflows**, reducing sprint spill-over by 20% through proactive technical blocker resolution and resource planning for a 6-member team.
- Architected a **Reusable Component Library** in Angular, which accelerated development speed by 25% across 3 concurrent BFSI workstreams.
- Led architecture reviews and design approvals with client tech leadership.
- Managed AWS CI/CD pipelines for UI releases
- Established UI architecture and coding standards across BFSI programs

Synechron

Lead Technology – Angular / UI Developer

02/2023 - 11/2024

- Built Angular UI modules integrated with Java/FTL backend serving 200K+ users in BFSI domain
- Delivered 25+ customer & banker-facing Angular features improving task completion rate by 18%
- Identified and resolved 50+ critical security vulnerabilities, improving application security compliance by 100%.
- Orchestrated the **end-to-end migration** of legacy Java/FTL modules to Angular 14+, resulting in a **40% improvement in UI responsiveness** and maintainability.
- Implemented a **Rigorous Code Review Process** and TDD (Test Driven Development) patterns, reducing post-production defects by 15%.

TCS

IT Analyst – UI / Angular Developer

09/2018 - 02/2023

- Developed and enhanced Angular UI features for BFSI platforms
- Integrated REST APIs with Angular services and reactive UI components
- Mentored 5+ developers on Angular best practices
- Acted as SME for Angular migration and modernization initiatives
- Contributed to Angular architecture decisions and UI coding standards

EDUCATION

Prof. Ram Meghe Institute of Technology & Research, Amravati, India

Bachelor of Engineering (B.E.) in Computer Science

June 2015 - June 2018

Shree Datta Meghe Polytechnic, Nagpur, India

Diploma in Information Technology

June 2011 - June 2013

PROJECTS

CitiBank – Customer Appointment Scheduling (CAS) Application

- Developed frontend features for customer and banker appointment scheduling platform.
- Integrated REST/Web APIs with Angular services for real-time data binding.
- Implemented responsive UI components using Angular, HTML5, CSS3, and JavaScript.
- Managed source code using Bitbucket and tracked defects using JIRA.
- Deployed builds across Dev and UAT environments using Jenkins and RLM pipelines.

TIAA – Unified Desktop (UD) & MyTIAA Applications

- Built user-facing and banker-facing modules using Java and FTL templates.
- Developed UI features and data flow between Java backend and FTL frontend.
- Implemented CRUD operations and contract-related transaction features.
- Participated in defect tracking and resolution across multiple releases.
- Supported modernization and migration activities across application modules.

Hartford Insurance – CUE Application

- Led frontend development strategy for Angular-based insurance management platform.
- Developed high-performance UI components and responsive layouts.
- Conducted code reviews and enforced UI coding standards.
- Created and executed unit and automation test cases using Jest and Karate framework.
- Mentored junior developers and improved test coverage and code quality.

Participant Money Out (PMO) Application

- Worked on vulnerability remediation and secure code fixes in Java modules.
- Used Jenkins build pipelines to identify and resolve security vulnerabilities.
- Supported secure deployment and compliance improvements.

Fiat Chrysler Automobiles (FCA) Website Enhancements

- Implemented UI enhancements and new features for enterprise website revision project.
- Developed pixel-perfect responsive layouts using HTML5, CSS3, and media queries.
- Ensured cross-browser compatibility and UI consistency.

SKILLS

Core UI Architecture: Angular (v14-v18), RxJS, Signals, NgRx, Micro-Frontends (Module Federation).

Performance & Security: Web Vitals Optimization, Lazy Loading, Tree Shaking, OWASP UI Security, OAuth2.

Testing & Quality: Jest, Jasmine, Karma, Cypress (E2E), SonarQube (Static Analysis).

Backend & Cloud: Core Java/J2EE, Spring Boot (Basics), AWS (S3, CloudFront), CI/CD (Jenkins, GitHub Actions).

AWARD

Star of the Month Award (2023)

- Recognized for escalation-free delivery and consistent high-quality deliverables

Star of the Sprint Award (2021)

- Awarded for outstanding business outcomes through innovation, collaboration, and agile delivery excellence

Excellence Award (2020)

- Recognized by client for supporting multiple customers and delivering accurate, high-quality business reports

Client Appreciation Award (2020)

- Received client recognition for zero-defect delivery and strong project contribution

Featured in Hartford Client Newsletter (2025)

- Recognized by client and Capgemini leadership for project impact and delivery quality
